DETAILED ACTION

Claim Rejections - 35 USC § 102

- 1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
 - A person shall be entitled to a patent unless -
 - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 5, 6, 7, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Nobuo et al. (JP 410234553A). Nobuo discloses a similar system comprising a(n):
 - Detection means (abstract line 5 & 6) for detecting an identifier (22) distributed together with sushi
 - Recorder or determination means (abstract/L7-9) for determining a kind of sushi arranged on said plate, based on the identifier detected by said detection means (kinds and pieces are counted)
 - Storage means (determination results are kept and stored in order to do a price calculation, abstract/L9)

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 9, 10, 11, 16, are rejected under 35 U.S.C. 103(a) as being unpatentable over Nobuo et al. (JP 410234553A) in view of Yuichi (JP 06314285A).

Nobuo et al. discloses all of the claim limitations, as shown above, but does not disclose a storage means for storing a time period elapsed after preparation of a product, to be associated with said information for identifying a plate.

Yuichi teaches the use of a storage means for storing a time period elapsed after preparation of a product (constitution) for the purpose of rapidly and correctly recognizing the salable and unsaleable aptitude of a commodity that is circularly carried on a belt (abstract), thus preventing the sale of food that has been circulating too long and may have spoiled.

It would have been obvious to one having ordinary skill in the art at the time of the invention to have provided a storage means for storing a time period elapsed after preparation of a product, as taught by Yuichi, in the device of Nobuo et al. for the purpose of rapidly and correctly recognizing the salable and unsaleable aptitude of a commodity that is circularly carried on a belt, thus preventing the sale of food that has been circulating too long and may have spoiled.

Regarding claim 10, Yuichi discloses a disposal means (37) for disposing of product when a predetermined time has elapsed after preparation of a product.

Regarding claims 11, it would have been obvious to one having ordinary skill in the art to have changed the predetermined time depending on a kind of a product since different food products spoil at different rates.

Allowable Subject Matter

5. Claims 1-3, 13-15, 18 are allowed over the prior art of record.

6. Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

 The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
